

# AS Control Plus

## For overflow pools

**Intelligent  
management  
of your  
overflow pool**

**AS Control Plus:**  
A more economical overflow pool  
Fully automated

AS Control Plus is a unique all-in-one control unit designed specifically for overflow pools with a large multi-functional digital display for easy menu navigation.

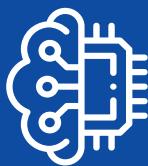

**Save at least 10'000 KWh per year with  
the AS Control Plus!**

The most beautiful pools are those with overflow.

However, there is one major drawback: the loss of energy caused by evaporation during overflow.

By combining a Besgo 3-way valve with your AS Control Plus, you can direct the water to either the overflow channels or the bottom drain of the pool, depending on the outside temperature, to stop evaporation and thus energy consumption.

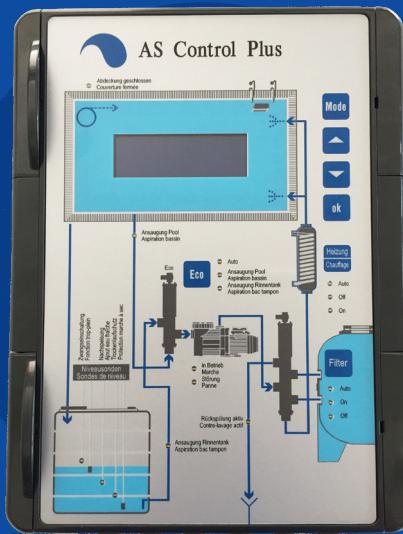

# The following functions are controlled and displayed

**Optional with**  
Wifi module

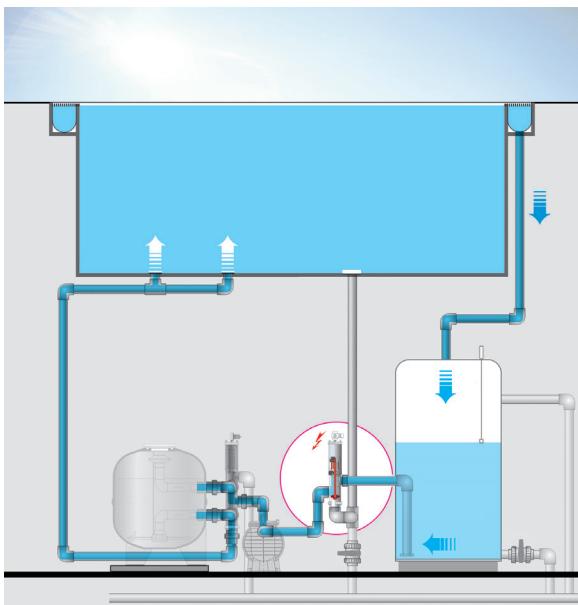

- Display of water & air temperature ○  
+ various operating conditions
- Complete filtration management + ○  
electronic circuit breaker / protector
- Automatic backwash and rinsing ○  
control (time or pressure controlled)  
with Besgo 5-way and 3-way valves
- Level control for buffer tank ○  
with 5 probes
- Heating control with frost protection, ○  
priority switching and delay timer

- Balance tank control  
(backwashes directly from the  
the pool or the balance tank)
- Energy efficiency control: Normal or  
economy mode with Besgo 3-way  
valve
- Connection for pool cover
- Connection for external switch  
(main drain, buffer tank, auto)
- Connection for chemical  
measurement and dosing system  
(230 V and potential-free)

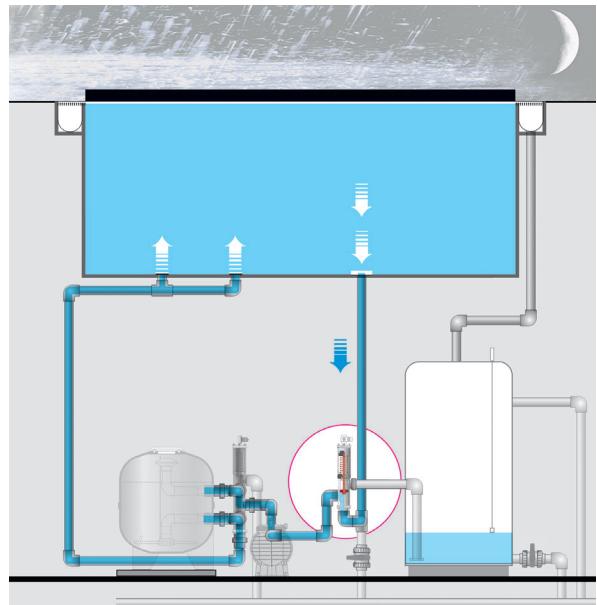

## Normal Mode

Suction from the overflow channels on sunny days  
for optimal hydraulics

## ECO Mode

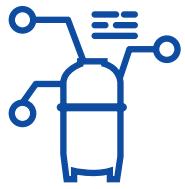

No evaporation from the overflow channels  
- No energy losses!

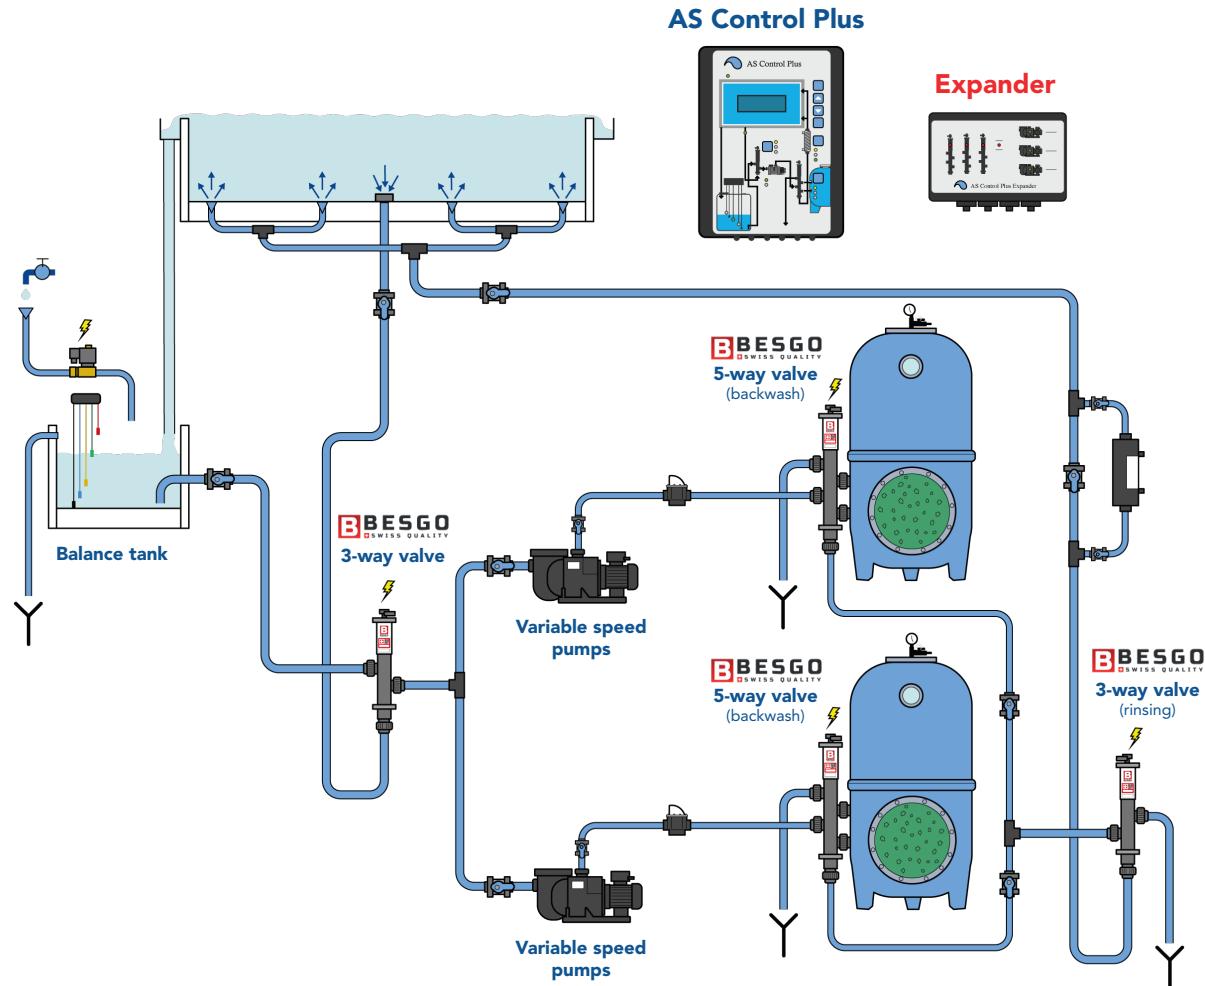

In economy mode (suction directly from the pool) the water does not overflow. Evaporation and energy losses are considerably reduced. With an investment of about 3000 EUR you can save at least 10'000 kWh per season.  
In addition you benefit from an automatic filter backwash for easy maintenance.
